The Burbank
Earliest Tomato in the World

I am pleased to offer this season a New Tomato which is one of Luther Burbank's latest creations. This is what he says of it—"It is by far the Earliest and Smoothest, and is such a compact grower that it may be planted from one-third to one-fourth closer each way, thus making it also the Most Productive Tomato in the World. The fruit is bright crimson-red, thick, solid, heavy, medium to large in size, of superior quality and is a continuous bearer. The Burbank has one other unique and most remarkable quality which will be appreciated by those who like fresh sliced tomatoes for the table, that the skin peels more freely than any other from the rich firm flesh." This New Tomato is so good that I do not want one of my customers to fail to grow it this year.

Pkt., 10c; 3 pkts., 25c.
I FEW PERSONAL WORDS

Again I am placing in the hands of my friends both new and old my annual SEED BOOK, and wish to announce that in my many years of experience I have never been better equipped in quantity and quality of SEED STOCK, and in readiness to meet the needs of all my customers.

There is nothing haphazard in the selection and production of the seeds listed in my SEED BOOK for I make this a constant study. I always have a complete list of the choicest standard varieties, and add new varieties from time to time such as I believe will please my customers. This year I am offering a NEW TOMATO (see front cover), one of Mr. Burbank's new creations. This cannot but please all who give it a trial. I call special attention to my TRIAL GARDENS (see views, this page), where I PERSONALLY SUPERINTEND THE TESTING of all my seeds before placing them in stock. I supply my customers with only such seeds as have been tested and are of high germination. This means GOOD GARDENS FOR ALL under proper care.

I wish to remind my customers of the fact that after CHOICE OF VARIETIES and QUALITY OF SEED STOCK there is still another item to which I give special attention and that is PRICE. I know the importance of this in these days when the costs of all commodities are soaring high; and on this account I have held my prices as low as possible for the quality of stock I offer. The cost of production, growing of seeds, labor, paper and materials, has greatly increased during the past year, but I have kept my prices the same as last season except in the cases of a few varieties. Being located as I am right on one of my Seed Farms, with no city expenses or rents to pay, makes a saving which enables me to sell my seeds at the lowest possible prices.

I appreciate so large a patronage and wish to thank my customers for the many orders they have sent me in the past. I shall strive to merit a continuance of this confidence and supply always with the "best there is."

I am expecting an unusually large demand for seeds this season, and would advise ordering as early as possible. 34 YEARS IN THE BUSINESS.

ORDERING MADE EASY

HOW TO ORDER—It is very easy for anyone to order Seeds from me. In making out an order always write Name, Post-Office, R. F. D. and Box, County and State, the first thing you do, and then write the varieties you want, quantity of each and carry out the price after each one and enclose the total amount in any convenient form of remittance and send it to me, when I will do the rest. Be sure to use my Order Form.

FREE BY MAIL—I send Seeds postpaid by mail at the postpaid prices named in this Seed Book, except where there are special quotations for the seeds to be sent by Express, customers to pay the express charges. This brings my seeds to the door of my customers without any trouble and expense.

CANADA AND FOREIGN ORDERS—Must include 20 per cent of the order extra for the additional postage and packing required.

I GUARANTEE that every package I send out shall reach its destination in good condition, and that everything shall be received as ordered, and if not, I must be notified at once. If a package is lost, or any of its contents injured on the way, I will refund again.

FORWARD MONEY with the order, and at my risk, when sent by Post-Office Money Order on Rose Hill, N. Y.; bills or coin, by Registered Letter; Bank Draft or Express Company's Money order. Post-Office Money Orders are the cheapest and safest method for remittance. I earnestly request my patrons to remit by Money Order if possible.

STAMPS AND COIN—Do not send postage stamps in payment for goods if it can be avoided. The loss is great on account of being obliged to find buyers. Coin, when sent in letters, should be sewed or pasted up in strong paper or cloth, to prevent its breaking through the envelope. I will not be responsible for coin sent me except by Registered Letter, nor for Stamps.

MY GUARANTEE—I sell tested seeds—you get the best that money can buy. Should failure result from any fault of the seed, you can have the order refunded. Seeds are subject to climatic and other conditions over which I have no control, after once being placed in the ground; therefore, I can give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds I send out and I will not be in any way responsible for the crop, and every order for articles named in this Seed Book will be executed on these conditions only. If the purchaser does not accept the same on these terms, they are at once to be returned.

Leaflets on Culture Free with Order

I have prepared several Leaflets on Culture, as listed below, which I will mail free with your order if you mention which ones you wish when sending in the order.

HOW TO GROW BEANS. MELON CULTURE.
HOW TO GROW REETS. TOMATO CULTURE.
HOW TO GROW CABBAGE AND CAULIFLOWER. INSECT PESTS IN THE GARDEN.
HOW TO GROW ONIONS FROM SEED.

Our interests are really mutual—Your success is my success—I want to help you all I can for I want you to have the finest garden in your neighborhood by planting Mills Seeds.

F. B. MILLS, SEED GROWER - ROSE HILL, N. Y.
Grow Mills Tested Seeds

If you want high grade tested vegetable and flower seeds, I can supply you. Read every page of this seed book.

Beans

I offer the best varieties of Beans for the home garden and for field crops, every garden should have plenty of the Wax Green Pod and Limas. My 1200 to 1 Bean has made a wonderful record and you should grow it for a field crop. All prices are by mail, postpaid.

(Leaflet "HOW TO GROW BEANS" Free with every order if asked for.)

Giant Stringless Green Pod

Just the Bean to Plant in Home Gardens Where Only a Few Are Grown

It is claimed to be absolutely stringless and the best stringless bean. The pods are ready for market several days earlier than the best strain of Red Valentine, making it very valuable. The rich, green pods, from 5½ to 6 inches long, are so round that the back is crossed, and when full grown are of fine flavor and very tender. It is very valuable for market gardeners and canning establishments.

Pkt., 10c; 3 pcks., 20c; 6 pcks., 30c; ½ lb., 25c; lb., 45c; postpaid.

Bountiful Bush

This is a prolific and continuous bearer, very tender and of excellent flavor. The plant is very handsome, thrifty in growth and is extremely early. The rich green pods are of enormous size, broad, thick, very long, uniform in shape, moist and of high quality, absolutely stringless and free from any tough lining, not only when young but this tender quality is retained to maturity.

Pkt., 10c; 3 pcks., 20c; 6 pcks., 30c; ½ lb., 25c; lb., 45c.

Sure Crop Wax

Very Best for Early Planting

This is a very early handsome wax bean producing an abundance of crisp, tender, stringless pods. The handsome yellow pods are 5 to 6 inches long, oval in shape and of excellent quality and flavor. It is as nearly rust-proof as any good wax podded bean can be. The plant grows very vigorous and is enormously productive being the hardest of the wax sorts, and you can always count on a sure crop, hence its name. This is the variety you should plant for early wax beans in your garden.

Pkt., 10c; 3 pcks., 20c; 6 pcks., 30c; ½ lb., 25c; lb., 45c.

Mills Rust-Proof Wax

One of the best rust-proof wax beans in cultivation and has proved the nearest to perfection of any variety. Very early, grow upright and robust, holding their pods up well from the ground, which are always of a beautiful color; unsurpassed in quality; pods golden yellow, about 5½ inches long.

Pkt., 10c; 3 pcks., 20c; 6 pcks., 30c; ½ lb., 25c; lb., 45c.
Two Bush Lima Beans
I offer two Bush Limas, both excellent sorts. The dwarf bush lima produces medium sized plant and bean, while the mammoth bush lima produces much larger pods and beans, and is preferred by many.

Dwarf Bush Lima
The plant grows erect, branching freely and bears enormous crops and the beans are ready for use as early as any other. The pods measure 5 to 6 inches in length, containing 4 to 5 beans each. The green beans, even when of full size, are tender, juicy and sweet in flavor when cooked. It is a grand bush Lima Bean, but not so large as Mammoth.
Pkt., 10c; 3 pkts., 25c; 6 pkts., 40c.

Mammoth Bush Lima
Enormous Pods, Excellent Flavor, Extremely Prolific
This Mammoth Bush Lima grows in dwar'f or bush form and produces beans as large as Pole Limas, ready to use ten days to two weeks earlier. The plant grows 18 to 20 inches high and has an erect branching stem. It is without doubt one of the most desirable lima beans ever introduced. The luscious flavor of the beans and their size are equal in every way to the climbing Lima beans.
This mammoth bush lima is an enormous yielder and every garden should have some of these limas.
Pkt., 10c; 3 pkts., 25c; 6 pkts., 40c.

Coffee Beans
The coffee or Soya Bean is a great yielder and is easily grown in any ordinary garden soil being very prolific. The plant grows very strong, producing a great abundance of pods containing the coffee beans. It is claimed by many that an excellent drink very nearly equal to good coffee can be made. Many people preferring it to genuine Postum Cereal. Be sure to try this wonderful bean this year. It can be planted in May and cared for the same as beans.
Pkt., 10c; 3 pkts., 25c; 6 pkts., 40c.

Big Yield in Canada
Mr. N. W. Pinch, of Ontario, Canada, writes—
I got some of your 1200 to 1 Bean last year, and was very much pleased with them. One of 50 good plants they averaged between 1400 and 1500 beans to each bean. I took the trouble in counting them. They are the best bean I ever saw.

Elmer Sherwood, Middletown, Middlesex County, Mass., writes: Last spring I ordered three packets of your 1200 to 1 beans. I gave one packet to a neighbor and planted the other two. To tell the truth no one in this neighborhood had so many beans as so few plants. I counted 1250 beans on one plant.

Mr. J. J. DeLong, Schenectady Co., N. Y., writes: In regard to the two packets of Tomato and Cucumber seed I got from you last spring, I can say that they are the best I ever grew, tomatoes average about 1 pound each and we got about 6 bushels, and we got from 750 to 1000 cucumbers.

Golden Cluster Wax Pole Bean
As shown by the illustration Golden Cluster produces long, stringless, golden colored, waxy pods 7 to 8 inches long in clusters of 4 to 6. It is medium early and of excellent quality. The vines grow large and vigorous and if the pods are kept picked off and not permitted to ripen the vines will bear continuously until killed by frost. It is a splendid variety for the home garden and for market.
Pkt., 10c; 3 pkts., 25c; 6 pkts., 40c; ½ lb., 50c.

Mr. C. F. Rhode, Schuylkill Co., Pa., writes: I received fine results from the seed I ordered from you in the spring. I took about from my garden on the 4th of July, the dice of an ordinary head; the world's largest Cabbage seed is some fine sort, gets as solid as can be. Shall look forward for your 1925 Seed Book.

Prolific Tree Bean
A Bean largely grown for market one of the best to grow for a field maturing in about 60 days from pick. Plants grow from 1½ to 2 feet high, branch freely, producing a large yield. Pure white beans of best quality, twice larger than the Navy Pod and a much heavier yielder.
Pkt., 10c; 3 pkts., 25c; 6 pkts., 40c; ½ lb., 50c; 1 lb., 80c; 2 lb., $1.00.
1200 to 1 Bean

This bean has made a wonderful record everywhere, and those who have grown it admit that it is the most profitable variety to grow for shelled beans as a market crop. It will produce more beans from the amount of ground planted and the quantity used for seed than any other variety of white beans I know of. It should be planted in rows 25 to 30 inches apart and from 10 to 15 inches apart in the row, according to the richness of the soil, only one bean in a hill. The plants grow strong and erect about 2 feet high, branching freely, producing great quantities of pods that are well filled with nearly round, medium sized, pure white beans of best quality. They ripen very evenly in from 70 to 90 days after planting according to the season, permitting harvesting all at one time, which is very important in bean raising.

More than 1200 beans have been produced on a single plant, and this is why it was named 1200 to 1. This name does not indicate or mean that all plants will produce such large yields for the season, soil, time of planting, care, etc., have everything to do with growing beans, but I am fully convinced that it will be greatly prized by all who grow it.

Mr. Henry Barnard of Hilk County, Mo., writes: 'I inclose you photographs showing the results of my beans this season. The bean in my right hand is the ordinary navy bean plant, and the one in my left hand is my 1200 to 1 plant. Your 1200 to 1 Beans are the greatest yielders of any beans I ever grew. It is almost unbelievable the great quantity of beans a minute plant will produce.'

J. P. Gray, District Agent of Columbus, writes: 'For your information let me tell you what your 1200 to 1 Beans did for me. I got 7 pkts. last spring, about 350 beans, planted them in two rows about 200 feet long and picked 21 quarts of dried beans, which I believe about a peck of pods containing 8 beans each. Your catalog illustrations are far too modest.'

Mr. Charles H. Fuller, Washington County, Vt., writes: 'When I wrote you a short time ago, acknowledging my satisfaction with the outcome of the seeds I bought of you last year, and sending order for seeds for the coming season, I forgot to tell you of my success with this "1200 to 1" Bean, and so I am enclosing a copy of a record I made. From this you will see that I tried out these beans in all kinds of soil. I did not put much labor or attention to all I planted, but with a few hills I did, and got what I consider a big crop. If I had planted all my pods in my best soil, and then given them one-half the care I gave to other vegetable production, I certainly would have gotten a tremendous yield of beans.'

Record of production from Mills' "1200 to 1" Seed Beans, in 1919, planted by Charles H. Fuller at Sunny Slope Garden, Washington County, Vermont.

Mr. J. P. Halston of Stotes County, N. C., writes: 'I ordered some of your 1200 to 1 Beans last year and they are the most wonderful beans I ever saw. I can sell $50 worth.

Mr. G. E. McElroy of New Brunswick, Canada, writes: 'Your 1900 to 1 Beans are great. I had some vines with 175 pods on them.

Mrs. Frank R. Korns of Lyon County, Iowa, writes: 'I sent for some of your 1200 to 1 Beans. They were sure wonderful.'

Mr. C. M. Kelly of Warren County, Ohio, writes: 'I bought three packets of your 1200 to 1 Beans and will say they beat any beans I have ever raised for production.'

Mrs. J. P. Decker of Santa Clara County, Calif., writes: 'Your 1200 to 1 Beans are a great success, pods hanging in great clusters, shall recommend them to all.'

Mr. R. Ogata of Kauai County, Hawaii, writes: 'The 1200 to 1 Beans ordered recently have resulted in excellent results in this country. It is a wonderful bean, which I have very choice supply of seed this season, and can make my customers the following prices:

Pkt. 8c; 3 pkts, 15c; 6 pkts., 25c; 15 pkts., 50c (over 60 beans to each packet); one-half pound, 30c; one pound 50c; postpaid.

Mangel Wurzels

Grown for Stock Feeding

This is the most popular long red mangel, sometimes called "Giant" or "Jumbo." It is the largest variety I know of. Grows about two-thirds of the ground and frequently weighs 30 lbs. each. It has produced over 150 tons to the acre. It is not coarse-grained, even when attaining enormous weight. It is one of the best for cattle and sheep feeding during winter. The illustration, carefully engraved from specimen, will give a good idea of the size and shape.

Pkt. 8c; 3 pkts., 8c; 6 pkts., 13c; oz., 10c; lb., 25c; ½ lb., 40c; lb., 75c; 5 lbs. (enough for one acre), $3.25.

Golden Tankard

This is the most desirable yellow Mangel, it contains more sugar and less water than any other variety of this color. It is highly prized by the dairy farmers. It matures quite early and under good cultivation will yield 40 to 50 tons per acre. Pkt. 8c; 3 pkts., 10c; 6 pkts., 13c; oz., 8c; ½ lb., 25c; ½ lb., 40c; lb., 75c; 5 lbs. (enough for one acre), $3.30.

Giant Half Sugar

This Mangel is white, with a rose top; flesh white. It is one of the most profitable for stock feeding on account of wonderful cropping quality and for the superior amount of its sugar. It is as easily grown and harvested as any and only yields the sugar beet.

Pkt. 8c; 3 pkts., 10c; 6 pkts., 13c; oz., 8c; ½ lb., 25c; ½ lb., 40c; lb., 75c; 5 lbs. (enough for one acre), $2.25.
**TABLE BEETS**

Every garden should produce sufficient for Summer use and Winter storage. I have an extra choice supply of seeds. *(LEAFLET, "HOW TO GROW BEETS"—FREE WITH ORDER IF ASKED FOR)*

**Mills’ Extra Early Blood Turnip Beet**

*(It’s My Great Early Blood Beet. Pkt., 5c; 3 Pkts., 15c; 6 Pkts., 25c; Oz., 40c; ½ lb., 50c.)*

**MARKET GARDENER’S BEET**

**MARKET GARDENER’S—**This grows very rapidly and continues to grow for a long time, making a heavy root for autumn or winter use. The quality is good at all stages of growth. It is an excellent keeper all winter; a very dark red in color and throughout the very best for table use. The shape is symmetrical; small top and very handsome in appearance.

Pkt., 5c; 3 pks., 10c; 6 pks., 18c; oz., 12c; ½ lb., 35c.

**EDMUND’S EXTRA EARLY BLOOD TURNIP—**This is a splendid variety; has a neat top, round in form, smooth and of good marketable size for gardeners. The skin and flesh are a deep blood red, very sweet and an all-around garden beet. It is largely planted in private gardens.

Pkt., 5c; 3 pks., 10c; 6 pks., 18c; oz., 12c; ½ lb., 35c.

**Improved Long Red**

This is the best long red beet on the market, being unequaled for the table or live stock. It is popular everywhere. Tops are large; necks small; roots, stems and vines red; leaves green. Roots are large; tapering at both ends, growing nearly even with the surface. Flesh and skin dark red, tender, sweet, and remains so when kept until spring.

Pkt., 5c; 3 pks., 10c; 6 pks., 18c; oz., 12c; ½ lb., 35c; postpaid.

**Swiss Chard or Spinach Beet**

Also called Silver Beet and Sea Kale Beet. The leaves are used for greens the same as Spinach or beet tops; they are equal in quality and easier to prepare than Spinach, and far superior to beets. Nothing in the garden requires less care, and yet it yields a constant crop from July to winter and can be used all summer when Spinach is not available.

Pkt., 5c; 3 pks., 10c; 6 pks., 18c; oz., 12c; ½ lb., 35c.

**MIXED BEETS**—Special Mixture, all varieties giving supply entire season. Pkt., 5c; 3 pks., 10c; 6 pks., 18c; oz., 12c; ½ lb., 50c.

**Swiss Chard or Spinach Beet**

**Crosby’s Egyptian Beet**

A carefully selected strain of Egyptian, as early as the original, but larger, thicker, smoother, and of better quality; flesh deep blood red, a rapid grower, attaining usable size quicker than most other varieties.

Pkt., 5c; 3 pks., 10c; 6 pks., 18c; oz., 15c; ½ lb., 50c; postpaid.

**ECLIPSE—**This beet is quite early and is superior to many other table beets. I have taken particular pains in selecting this strain for many years, and can furnish you with produce beets with a very small top, smooth, fine grain, tender and of a bright red color. I believe this is one of the best known beets and has given satisfaction to all who have grown it.

Selected Stock. Pkt., 5c; 3 pks., 10c; 6 pks., 18c; oz., 12c; ½ lb., 35c.
CARROTS

Ox-Heart or Guerande

Specimens have been raised measuring over 7 inches in diameter. The quality is extra good and I can recommend it for home use. It can be pulled where other sorts require digging.

Pkt., 5c: 3 ptk., 10c; 6 ptk., 18c; oz., 12c; % lb., 35c.

See Novelties Pages 26, 27

GIANT SHORT WHITE—Very productive; grows well out of the ground, making it very easy to harvest. Roots are short, flesh rich, white, solid, and excellent. Pkt., 35c.

MASTODON—This is a very large and productive white Carrot. Flesh is pure white, crisp and solid; very sweet in flavor. Roots of large size, frequently measuring 10 to 18 inches in length. Yielding 20 to 25 tons per acre. Pkt., 5c: 3 ptk., 10c; 6 ptk., 18c.; oz., 12c; % lb., 35c.

MILLS CHAMPION YELLOW—It is of a beautiful yellow color and the best for dairymen. It is not only valuable as a Carrot for stock, but it is sown at the rate of from twelve to fifteen pounds of seed to the acre, it will be an excellent one for table use. Pkt., 5c; 3 ptk., 10c; 6 ptk., 18c.; oz., 12c; % lb., 35c.

GOLDEN BEAUTY—This is a heavy cropper and suitable for both table and stock. It is a half-long stump-rooted sort; grows a smooth, uniform, handsome root, free from core, sweet, and tender; never becomes stringy. It is very desirable for any private garden on account of its immense yielding qualities. Pkt., 5c: 3 ptk., 10c; 6 ptk., 18c.; oz., 12c; % lb., 35c.

IMPROVED LONG ORANGE—The roots are of large size, smooth and of excellent quality for table use. The color is a deep orange, as indicated by its name. Will produce enormous crops and is well adapted to light soil. It is also well suited to dairymen on account of its heavy yields.

Pkt., 5c: 3 ptk., 10c; 6 ptk., 18c.; oz., 12c; % lb., 35c.

GROW MILLS ENORMOUS PEAS—IT'S A BEAUTY—See Page 26

Cress

FINE CURLED—(Pepper Grass)—Agreeable taste to salad. Pkt., 5c: 3 ptk., 10c; 6 ptk., 18c.; oz., 12c; % lb., 35c.

BLACK—Pkt., 5c: 3 ptk., 10c; 6 ptk., 18c.; oz., 12c.; % lb., 35c.

WHITE—Very best, mild and exceedingly tender. Pkt., 5c: 3 ptk., 10c; 6 ptk., 18c.; oz., 12c.; % lb., 35c.

Kohl-Rabi or Turnip-Rooted Cabbage

EARLY PURPLE VIENNA—It is largely grown for table use.

Pkt., 5c: 3 ptk., 10c; 6 ptk., 18c.; oz., 12c.; % lb., 35c.

EARLY WHITE VIENNA—Best for table use.

Pkt., 5c: 3 ptk., 10c; 6 ptk., 18c.; oz., 12c.; % lb., 35c.

Okra or Gumbo, White Velvet

Never prickly and always round and smooth, unlike other varieties which are either ridged or square edged. Outyields other varieties.

Pkt., 5c: 3 ptk., 10c; 6 ptk., 18c.; oz., 12c.; % lb., 35c.

Collards

TRUE GEORGIA—Known as Cole or Collards; originated in the South. Grown South for greens.

Pkt., 5c: 3 ptk., 10c; 6 ptk., 18c.; oz., 12c.; % lb., 35c.

Asparagus

PALMETTO—This is the finest and best variety grown; remarkably tender and rich when cooked, free from any tough or woody fibres.

Pkt., 5c: 3 ptk., 10c; 6 ptk., 18c.; oz., 12c.; % lb., 30c.

Endive

GREEN CURLED—This is a very hardy variety; has dark green leaves, always blanched white and crisp. Pkt., 5c: 3 ptk., 10c; 6 ptk., 18c.; oz., 12c.; % lb., 35c.

BROAD-LEAVED BATAVIAN—Produces large heads of broad leaves, used for flavoring soups, and if blanched, the leaves make a good salad. Pkt., 5c: 3 ptk., 10c; 6 ptk., 18c.; oz., 12c.

Dandelion

IMPROVED LARGE LEAVED—Very early; if sown in May will be fit to cut in July. A very valuable variety.

Pkt., 10c: 3 ptk., 20c; % oz., 15c; oz., 6c.

Cress
CABBAGE

I OFFER A GOOD SELECTION OF VARIETIES

All Head Early This is a famous Flat Head Summer Cabbage and has proved valuable everywhere and is a money maker. The deep flat heads are remarkably solid and the most uniform in size and shape. The heads grow so compact that fully a thousand more heads can be obtained to the acre than any other cabbage. It is suitable for growing in the spring and early summer, or if sown in July, for use as a winter sort. Selected Stock - Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 25c.

Mammoth Rock Red Largest Red Cabbage known; heads of a deep red inside and out and almost as solid as a rock. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 40c.

Copenhagen Market

Early Spring This is a first class, extra early, round, flat head Cabbage. The heads are always uniform, remarkably solid with few loose leaves, of fine quality with small cores, and have an average weight of about 10 lbs. each. This Cabbage is unrivaled as large headed early cabbage. If you grow Copenhagen Market you will have one of the finest early cabbages.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 25c.

Early Jersey Wakefield I offer the finest strain of Jersey Wakefield to be had. It is a well known variety, producing large heads almost as early as any of the other sorts. You should never buy cheap seed of this variety.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 40c.

Early Winningstadt Forms large, compact heads of excellent quality, and is nearly always certain to head, as it will grow solid heads in seasons when some sorts fail to produce anything. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 25c.

60-Day Cabbage

MY 60-DAY CABBAGE IS A GREAT VARIETY AND SHOULD BE PLANTED IN EVERY GARDEN IN THE COUNTRY. I was very fortunate in securing this strain of Cabbage, which is even earlier than my famous "Earliest Flat Head." 60-Day is just what its name implies, and is the quickest growing cabbage, and is sure to please everyone who plants it. The heads are large, very solid and just the size for market gardens, truckers or home gardens; maturing so early will readily sell in any market. The illustration well shows the Cabbage, and almost every plant is sure to form a perfect head. They can be planted close together and will form a large crop and I am sure that my customers will appreciate it. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 40c.

Mills Earliest Flat Head Cabbage

Produces Fine, Good-Sized, Solid Heads. Fit for Market 70 to 80 Days from Sowing the Seed

This is just the Cabbage for your garden, producing fine, solid, good-sized heads at a cost in 70 to 80 days from sowing the seed. Its shape and habits of growth are shown in the illustration, the deep flat heads being remarkably solid and the most uniform in shape and of any variety. It is a beautiful cabbage in appearance and on account of its rapid growth is well adapted for early sowing and others for tenderness. I am particularly anxious to have every one of my customers who grow Early Flat Heads this year.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 25c.
Giant Solid Head Cabbage
Great Winter Keeper

This is a grand late Cabbage and all who have grown it are more than pleased. It is a late variety, and the heads are as solid and hard as Ball Head. Grows very compact, as shown by the shape in the illustration. It certainly is a handsome cabbage, on account of the heads being so round and deep, and it is not liable to crack. As to quality there is no better variety, there being no coarse ribs or stems to be found in the head. A very vigorous grower and will stand drought to a remarkable degree. The heads grow so even and solid that they will average 10 to 12 lbs. each through a whole crop. It is highly recommended for its keeping qualities, and is an excellent sort to grow for storing or eating markets. If you grow only one variety of cabbage this season, let it be this one.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 40c.

Mills Giant Late Flat Dutch

It forms large, solid heads, uniform in size and color, handsome in appearance. It has a very short stem and at the same time is a compact grower. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 40c.

Danish Ball Head

This Cabbage comes from Denmark and it is exclusively for Winter Cabbage. The heads are hard, round, deep, and solid, and are fine-grained and good keepers, and not so late as the Late Flat Dutch, which makes it tremendously popular for winter market and I believe that in many sections where cabbage is largely grown, at least five-sixths of all Winter Cabbage grown is Danish Ball Head.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 40c.

Surehead Cabbage

While the Giant Late Flat Dutch is a good one and always produces excellent crops, the Surehead comes close to it and produces large, solid, firm heads, even in the most unfavorable seasons. Few other varieties can approach it in fine quality and uniform reliability in forming solid heads. The heads are large, round, and solid, and are excellent for keeping and for storage. It is all head and always sure, a head, even where other varieties fail. Heads have weighed over 60 pounds.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 40c.

The Great World Beater Cabbage

This is the greatest of all the main crop Cabbages, enormous in size, one of the best keepers, and often produces heads from 3 to 5 lbs. in circumference, weighing from 30 to 50 lbs. each. The heads are fine-grained and it is considered the king of all Winter Cabbages. It is smaller in outer leaves than any other variety and it is always sure to produce more per acre than any other variety from the fact that the leaves are smaller and grow closer to the head. This Cabbage has stood all kinds of tests and met complete satisfaction everywhere. Try it in your garden this year.

Price, pkt., 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 40c.
SELECTED CELERY

Giant White Solid
SWEET AND NUTTY IN FLAVOR
This is a splendid winter celery, keeps well, flavor is peculiar, sweet and nutty. Stalks are very brittle, almost without any form when blanched. Stalks grow very strong, 20 to 30 inches high, of a beautiful ivory-white in color.

Pkt., 5c; 1 oz., 25c; 6 oz., 60c.

Giant Pascal
The stalks are large and stringless, color and bitterness, which bright yellow when after blanching. An excellent variety for shipping; does not rot or rot, grows more satisfactorily in the South than any other kind. It is a fine keeper and extra good blanched, retaining its color and appearance as long as any other variety in existence.

Pkt., 5c; 1 oz., 25c; 6 oz., 60c.

Dwarf Golden Heart
This variety is of dwarf habit and when blanched the stalk, which is very large, is of a pure golden yellow. It is very attractive in show, keeps well during winter. Pkt., 5c; 1 oz., 25c; 6 oz., 60c.

Mills Celery Mixture
This mixture contains a splendid collection of all the best varieties and most valuable plants in the world, and will certainly give the greatest possible satisfaction.

Pkt., 5c; 1 oz., 25c; 6 oz., 60c.

Golden Self-Blanching Celery
(GILT-EDGE STRAIN)
This is my Gilt-Edge Strain and I believe it is the best Celery in cultivation, and is also the most popular. It is always in demand where good celery is appreciated. It is half dwarf variety, growing about 18 to 20 inches high, with thick, heavily ribbed stalks which blanch easily to a clear waxy yellow. Grows stocky, heavy, perfectly solid; in delicate flavor, and is a good keeper. The heart is very large and solid. Stalks are crisp and of the very best quality.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 25c; oz., 50c.

White Plum Celery
This is a known variety, popular in the South, is the best and most blanched. The variety grows rapidly; an account of its cultivation every steurgardener can grow all the needs more and more. It will be ready to pick in October when blanched up. Very of the grandest in a very short time. All the selected strains a produce five:

Pkt., 5c; 1 oz., 25c; 6 oz., 60c.

MILLS CHOICE CAULIFLOWER

Mills Early Favorite
It will stand the heat and drought of any climate for the best of all and is the earliest and surest to head. For forcing it is particularly well adapted: as a sort for the family and market garden. It is unquestionably the largest as well as the best. It is a favorite with market gardening.

Pkt., 5c; 3 pkts., 15c; 6 pkts., 25c; oz., 50c.

Dry Weather
This new Cauliflower originated in Denmark. It has been grown in nearly all sections of America and proved to be a drouth resister. It produces a large, solid, pure white head nearly as early as Mills Early Favorite. It is especially adapted to dry localities and retaining the color of drouth. It will do well also in moist or wet weather and make firm, handsome heads.

Pkt., 5c; 3 pkts., 15c; 6 pkts., 25c; oz., 50c.
Mills Earliest or 12-Day Lettuce

Earliest in all my trials. A lettuce for forcing or for general crop, can be sown at any time. Very tender, remarkably crisp, very best quality. Resists heat, wet and drought to a remarkable degree. Is slow to run to seed. This is the greatest of all early Lettuces. It's a wonder. My Seed is all tested.

Pkt., 15c; 3 pkts., 45c; 6 pkts., 80c oz., 12c.

All Seasons Lettuce Collection

This is a wonderful collection and nothing can equal it. The growing produce supply for the season. This collection contains all the best varieties, maturing early, medium and late; some curled and ribbed, others produce heads. Colors range from pure white, through delicate shades of green and yellow, to a rich golden. I am sure this Great Lettuce Collection will mean more to every garden.

Pkt., 5c; 3 pkts., 15c; 6 pkts., 25c oz., 12c.

Denver Market

Solid head, a beautiful light green color; good for forcing or open ground.

Pkt., 5c; 3 pkts., 15c; 6 pkts., 25c oz., 12c.

Golden Ball

The heads are fine golden color. Early and slow to run to seed.

Pkt., 5c; 3 pkts., 15c; 6 pkts., 25c oz., 12c.

Crisp-as-Ice Lettuce

This is a beautiful lettuce of the cabbage type. The solid heads are of medium size, and the leaves are so tender and brittle as to have suggested the name. Crisp-as-Ice. Head has a rich yellow heart. The leaves are thick and glossy, somewhat curled, green color variegated with bronze. It cannot be overcrowded or overwatered for home use in spring or summer or late in the fall.

Pkt., 5c; 3 pkts., 15c; 6 pkts., 25c oz., 12c.
Sweet or Sugar Corn

Golden Bantam—One of the Sweetest Corns Grown

A GEM FOR THE SMALL GARDEN

This is pronounced the very best pure Golden Sweet Corn in existence, being vastly superior to all others in rich, sweet flavor. The stalks grow about 4 feet in height and produce from one to two good ears on each stalk, being from 5 to 6 inches long. When the ears are ready for use the grains are a bright golden yellow, being rich and sugary and sweetest of all. I have found Golden Bantam the best Sweet Corn to grow in the North and it is a good variety to plant late in the summer for fall use. My stock has been thoroughly tested and my customers should grow it this season. Just the sort for home garden. Pkt., 8c; 3 pks., 25c; 6 pks., 30c; 1 lb., 35c. 25c lb., 40c.

Mills First of All—Earliest of All Sweet Corn

This is the earliest Sweet Corn that I have been able to offer. It being a few days earlier than all others not only makes it valuable for family use, but extremely valuable for market, where the earliest corn always brings the highest price. It is rather dwarf in growth but superior in quality, tenderness, and sweetness. The photograph shows the form of the ear, which are of medium size and well filled with large grains to the tip of a very small cob. Why not have the earliest Sweet Corn in your neighborhood? If you plant First of All you will have. I have a very nice stock to offer this year, all extra selected. Pkt., 8c; 3 pks., 25c; 6 pks., 30c; 1 lb., 35c lb., 40c.

Stowell’s Improved Evergreen This well known variety is largely planted by private families, gardeners and farmers. There is no stock of Stowell’s Evergreen that can excel my “Improved,” it is the very best for main crop. Pkt., 8c; 3 pks., 25c; 6 pks., 30c; 1 lb., 35c; 2 lb., 40c postpaid.

White Evergreen This is one of the most delicious Sweet Corn ever offered. It is a splendid yielding and unsurpassed for market gardening purposes. We have pure snow white, large and well filled. It is sweet and most desirable for table use. I recommend the White Evergreen too highly, as it will give the greatest possible satisfaction to grow. If you want a great Sweet Corn, by all means include the White Evergreen with your order. Illustration gives a good idea of this valuable Sweet Corn. Pkt., 8c; 3 pks., 25c; 6 pks., 30c; 1 lb., 35c; 2 lb., 40c.

Orange Sweet This is a bandy, orange-colored resembling Bantam, producing slender ears, crisp, eating sweet and tender, main and a nice table variety, good for market use and for the home. It is a very good general crop, but it is a little and will more readily adapt itself to small gardens. Pkt., 8c; 3 pks., 25c; 6 pks., 30c; 1 lb., 35c; 2 lb., 40c.
POPCORN

Pop Corn is One of My Specialties
I Offer the Best Varieties Grown

**Quick Pop**
A very early variety producing from 2 to 4 perfect ears of a beautiful golden yellow color. This Pop Corn is very quick to pop, hence its name, and the kernels expand to a large size when popped. It is a beauty.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

**Australian Hulless**
This is a heavy yielding variety of attractive ears, peculiar in form, being nearly as thick as long. Kernels are similar to the best strains of White Corn, longer and slender, and pearly white in color. The crowning part lies in its popping qualities, thus flavor and absence of hull or shell. Tender and of delicious flavor when popped. Don’t fail to try this excellent pop corn.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

**Red Beauty**
It is very productive of a beautiful red color, and in every respect a first-class pop corn.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

**White Rice**
This is a well known variety and the leading sort for the market.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

**Mapledale Prolific**
This is a remarkable variety and the greatest yielding sort ever found among Pop Corn. Stalks grow about 5 feet high and it is claimed that as many as twelve ears have been produced on a single stalk. Its popping qualities are excellent, always pure white and of good flavor.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

**Black Beauty**
An extra early variety which pops very large and is most tender and crisp of all. Although the kernels are black, this color does not seem to show at all when popped, being then a pearly white. Extremity early, ripening so it may be popped the same year as grown, without kiln drying.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

**American Wonder**

**New Giant Variety**

See Novelties, page 27.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

**Herb Seed**
Those marked (*) are perennial and when once obtained in the garden, may be preserved for years.

- *Balm—Has Medicinal Qualities*
- *Carriander—Seeds Aromatic*
- *Caraway—Seeds Aromatic*
- *Chives—Leaves Aromatic*
- *Horseradish—Has Medicinal Qualities*

Price of any of the above varieties of herbs, 5c; 3 pkts., 10c; 6 pkts., 20c.

**Safe Crop Flint Corn**
*This is a splendid extra ear corn, and a great yielder, ears are of good length, well filled with large, plump grains which fill out to the extreme tip of a small cob. Stalks grow to a good height and bear from two to three ears under good cultivation. Every one who wants an early Flint Corn that will mature in the northern climate as far north as Canada can make no mistake in growing this one, for I consider it a safe corn to plant, hence its name “Safe Crop.” It is a very attractive variety being a cross between the very early strain of red, white and yellow Flint sorts. My supply is limited and I can only offer small lots so my customers may get a start.*

Pkt., 10c; 3 pkts., 25c; 6 pkts., 40c.

**Early Golden Dent Corn**
Here is a grand early, yellow Dent Corn for those who grow the Dent variety. As far as I am able to learn it is the earliest yellow Dent, producing large stalks and ears, generally two good ears to a stalk. Grains long and wide of a beautiful bright golden color. It also produces a large amount of leaves making it very desirable for stock raisers. Seed supply quite limited only being sufficient so that my customers may get a start.

Pkt., 10c; 3 pkts., 25c; 6 pkts., 40c.
CUCUMBERS

Mills Earliest Everbearing

This is a grand early everbearing variety and is bound to become one of the most popular cumber for growing outside or for forcing. It is very handsome in color and the cucumbers are just the right size. In productive tests it is hard to equal, producing an abundance of handsome fruits closely set on strong vines. It is the tender, whether grown outside or in the hothouse. In sections where cucumber has been raised in the past it has proved itself to be the most productive. There is always a good demand for it. It is the first to come and first to go. Fruit size 5½ oz.

**Japanese Climbing**

This grand variety comes from Japan. Young plants are bushy, but as soon as they become well established begin to climb and may be grown on fences, posts or trellises. Vines are healthy and vigorous. They begin to bear early and soon a to produce fruit throughout the season.

**Prolific Pickle**

Prolific Pickle is of medium size, slender, dark green. Pickles are solid and thick, excellent in quality. Enormously productive, vines set fruit when smaller than most other sorts.

**Improved Long Green**

This is a well known variety. The fruits grow from 12 to 16 inches long and it is well known by everyone that this variety cannot be surpassed for slicing or pickling, and when ripe it is the best for sweet pickles. The vine grows strong and the fruit is always produced in great abundance, making it one of the best productive varieties in cultivation.

**Nichols’ Medium Cucumber**

Uncrowned as a cucumber by anyone, it is a light green in color, smooth and firm and of the best quality.

**Mixed Cucumber**

This mixture contains early, good and late sorts. You have an abundance of varieties of cucumbers and for pickling or slicing and it is also excellent for forcing. It is very productive and very well suited for forcing. The fruits grow from 5 to 7 inches long.
MUSKMELONS

Mills Earliest—A Magnificent Melon

This is my earliest Muskemelon. It is ahead of all the other early Muskemelons. The melons are of uniform size, of fine shape and appearance, delightful quality and good in any market. They are nearly round, as may be seen by the illustration, of good size, finely netted. Inside is a rich orange color, and I venture to say the flesh is thicker than of any other variety. The seed cavity is very small. I can recommend this variety for home or market use. It is the earliest, sweetest and most delicious in my garden.

Mr. A. B. Ellis, Hennepin Co., Minn., writes: Your 1200 to 1 Bush is a wonder. I bred it from a quarry of fresh beans from my first 6 plants.

Emerald Gem One of the very best. Skin is smooth and emerald green in color. Fruits grow heavy and produce an abundance of fruit, very rich and sweet in flavor. A grand muskmelon. Grow it this season and be amused— it will always find a place in your garden.

Bush Muskemelon

The fruits are of the popular Jenny Lind type but larger, averaged 1 pound in diameter. They vary somewhat in size. The rind is about 1 inch in thickness. The flesh is very deep, edible almost to the rind, and is colored light green, flushed with salmon toward the center. The seed cavity is large, the quality is superb, lusciously sweet and juicy. On account of growing bush form it saves space. Should have a place in your garden.

Yellow-Meated Prize

This is a good melon, sweet and juicy flavor, with fine netting, thick, yellow rich flesh, very early and handsome in appearance with a very small seed cavity. The vines grow healthy, strong, vigorous and productive and it is a splendid variety to grow for the home garden and very profitable for the market garden. Pkt., 5c; 1 pkt., 10c; 6 pkts., 15c; 1 lb., 35c.

Montreal Market

One of the largest round muskmelons, weight from 15 to 20 pounds each, slightly ribbed; opens early and keeps well. Pkt., 5c; 1 pkt., 10c; 6 pkts., 15c; 1 lb., 35c.

Jenny Lind

This is a splendidly early variety, and one of the best muskmelons ever grown. Being very early, it is valuable for the very earliest market. The melons are handsome and of fine flavor. Pkt., 5c; 1 pkt., 10c; 6 pkts., 15c; 1 lb., 35c.

Mixed Muskmelons

A mixture that will produce early, medium, late, green flesh and orange flesh varieties and give handsome fruit throughout the season. Pkt., 5c; 1 pkt., 10c; 6 pkts., 15c; 1 lb., 35c.

Mills Giant

This is a splendid large melon and a great favorite with all who have grown it. It is handsome in form, of the very best quality; flesh is rich and sugary, grows large, and is productive. It has thick flesh and small seed cavity and is a splendid sort to grow on account of its large, handsome appearance. I think this is the largest of all the muskmelons. Try it.

Pkt., 5c; 1 pkt., 10c; 6 pkts., 15c; 1 lb., 35c.

Netted Gem or Rocky Ford

This melon has become famous everywhere. It is an early variety, skin is green, ribbed and thickly netted, while the flesh is thick, of a light green color. Melons have a very small seed cavity, are firm and full, and keep well.

Pkt., 5c; 1 pkt., 10c; 6 pkts., 15c; 1 lb., 35c.

Popularly Known as Canteloupes

Mills Earliest

Yellow-Meated Prize

Bush Muskemelon

Netted Gem or Rocky Ford

Mills Giant
Watermelons

Mills Earliest

This Great Early Watermelon is making a splendid record on account of its extreme earliness. It is sure to be the first in the market. Delicious in flavor, very juicy and sweet and always available. Excellent for family use, a few vines will yield many melons. It is excellent to plant if you are in a climate where the season is short, as it will ripen while many others will not mature. Has deep red, very brittle skin and large, firm, round, white flesh. Excellent for the market. A Superior home garden melon.

Pkt., 50c; 1 oz., $1.00; 1 lb., $3.00

Citron

In general shape, size and appearance this is similar to Kool's Gem, but is distinctly darker and the skin, when the melons rest on the ground is a rich yellow instead of white. As that variety it has a very firm, hard rind, an exceedingly good shipper.

Pkt., 50c; 1 oz., $1.00; 1 lb., $3.00

Iceberg or Blue Gem

In general shape, size and appearance this is similar to Kool's Gem, but is distinctly darker and the skin, when the melons rest on the ground is a rich yellow instead of white. As that variety it has a very firm, hard rind, an exceedingly good shipper. The Iceberg is an excellent melon for the market, being early, a large melon, and bearing a very fine flavor. Pkt. 15c; 1 oz., 25c; 1 lb., 50c.

Tom Watson

There is a great deal of talk for this Watermelon, which indicates that it is a good one. Although a new melon, it is a success in all sections where it is grown. The illustration gives a good idea of an average specimen. It's a large, green melon and often grown to weigh from 50 to 60 pounds and is excellent shipper, flesh an intense red color, smooth quality. This is what all melons grow for today. It's the great market melon.

Pkt., 50c; 1 oz., $1.00; 1 lb., $3.00

Sweetheart

This grand Watermelon is one of the earliest of the bulk type. Flesh very bright red, solid and thick. An excellent watermelon to grow. Pkt., 50c; 1 oz., 50c; 1 lb., 10c.

Dixie

Beautifully striped. The skin is an intense bright deep scarlet, very sweet and tender. Growers say that Dixie is the finest eating and most productive melon they have ever grown.

Pkt., 50c; 1 oz., 50c; 1 lb., 10c.

Kleckley Sweets

This Watermelon is becoming very popular. It is especially valuable on account of its fine flavor. It is a large, oval-shaped watermelon, with green rind. The flesh is very firm, colored in color and of the very best quality and crisp texture. An splendid family garden melon and always gives good satisfaction everywhere, and can highly recommend it to grow in the North or South. By all means plant it.

Pkt., 50c; 1 oz., 50c; 1 lb., 10c.

Great Watermelon

Wonderful Sugar
Watermelon

This famous Watermelon is of medium size, with striped or variegated skin, beautiful red flesh and light colored seeds. Flesh is entirely stringless, of perfect quality, very strong, thrifty and prolific, and well adapted to withstand either wet weather or drought. It is well adapted to nearby markets, but is rather delicate for long freight shipment. An excellent home garden melon of select quality.

You should grow this fine home garden melon.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 15c; oz., 5c; 1/2 lb., 30c; 1 lb., 50c.

CASABAS—Used as a Winter Muskemelon

CASABAS are a late variety of muskmelons to be classed in a group by themselves. They should be planted after all danger of frost is past, and picked and put away in a dry place just before frosts in the fall. All melons, even half-grown one, will ripen gradually, giving a continual supply all winter. I offer two varieties—Santa Claus and Golden Beauty.

Fine for Christmas

Keeps All Winter

Santa Claus

This is a real novelty and the name is very appropriate, as it is in prime condition to cut during the holiday season. Its light green flesh is stringless. It looks like a mottled muskmelon (see engraving). And very hard, there is no seed cavity. Seeds are imbedded in a small jelly-like pulp. Plant and cultivate as muskmelons. Plant a few seeds in your garden this spring.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 30c.

Golden Beauty

This is one of the best Casabas, and it is extensively grown and sold at very high prices during the early winter months. The melons are nearly globular in shape, bright yellow with golden tint and wrinkled skin. Measures 6 to 8 inches in diameter. The flesh is white, very thick, juicy and of delicious flavor.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 30c.

Hybridized Potato Seeds

FROM THE SEED BALLS—THE RAREST OF SEEDS

Millions never saw a Potato Seed Ball. Thousands have tried in vain to get the seed. Now is your opportunity. This untried seed will produce an endless variety of new kinds. Your fortune may be in one of them. They are as easy to grow as tomatoes.

Growing new and distinct seedling Potatoes from the Seed Ball seed is intensely interesting. They will be the greatest curiosity of your garden. This seed will positively produce innumerable new kinds, colors, shapes, sizes and quantities. The product will astonish you. Some may be of limitless value and bring you a golden harvest. Every farmer, gardener, and bright boy should plant a few packets. You may be one of the lucky ones.

Full directions on every packet.

Thousands of Dollars have been made producing new varieties of Potatoes, who knows but what you may do as well? In this new method you can afford to lose money and still be rich returns and “in the eingup ing game.” Then again with the new potato, you ripen the crown and reap the harvest and he is worthy of his reward.

Encourage your boy to try. Nothing would interest or benefit him more.

Photo of Potato Seed Balls—One-half Natural Size. It is from these that ALL valuable new varieties of Potatoes are produced.

Read These Extracts from Customers’ Letters

"I grew 101 Potatoes from one plant of your Potato Seed. Every plant was a different variety. —Miss. Ellen Kennon.

"I raised 50 hills from one packet; many kinds and colors; some early, some late. 94 Potatoes in one hill."—J. H. Smither.

"Your remarkable Potato Seed produced white, pink, red, purple, blue, cream, russet and black potatoes."—W. M. Johnson.

"Your Potato Seed is a wonder. I grew 115 different varieties from one packet—and I went to Every one of them ever saw."—E. E. Vilim.

"I grew 45 pounds of seedling Potatoes from one packet. I expect wonders from them next year."—Thomas Logan.

"The packet of Hybridized Potato Seed brought splendid results; some potatoes grew only half the natural size, I transplanted 15 hills. Every one of the new kinds that grow from these seeds,"—James Marks, New York City.

"I want to see another season's results before I grow more but the potatoes that are coming from the seed are simply wonderful. I find that the seed is doing well, and the potatoes are growing and covering the ground. We hope to have a large crop this year."—C. C. Matthews, Huntington, New York.

Try a few of these seeds and see the great collection you will grow.
Onions

Large Red Wethersfield

There are many strains of this celebrated Onion offered, but I am sure that none can surpass my famous stock of this popular variety. Some strains will not mature until late in October. I have for years taken particular pains in selecting from bulbs that will produce very large crops of these onions, maturing early in the fall and two-pound specimens the first year from seeds are of frequent occurrence. Yields of 600 to 800 bushels of my Wethersfield per acre are not uncommon. It is a magnificent keeper, the skin being a deep purple red, flesh pure white and moderately fine grain. They are excellent for shipping and I claim there is no strain that can surpass my famous stock of this popular variety. I consider it in every way a perfect red onion for home or market purposes.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 18c; 1oz., 20c; ½ lb., 60c; lb., $2.00, postpaid.

Extra Early Red Onion

This is one of the best varieties. I have seen it produce fine onion days from setting; mild flavor and keeps well, and grows in all soils. It is adapted to early market; particularly adapted for Northern latitudes, or when seasons are short and cold.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 18c; oz., ¾ lb., 60c; lb., $2.00; postpaid.

Giant Australian Brown

This is a very choice selected strain of Australian Brown Onion, grown from the very largest and best specimens. The color is good, as well as the shape. It is a hardy variety and the keeping qualities cannot be surpassed. These handsome onions are extremely heavy and yield an enormous crop, skin being of a beautiful golden brown. The flesh is white, very solid, sweet and of mild flavor. Its keeping qualities are remarkable and I believe it is the longest keeping of all onions, having been kept in good condition, fit for market, for over a year after being harvested. Try this onion in your garden this year.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 18c oz., 20c.

White Pickling

This is the earliest Onion in culture, producing very little white bulb, which are mild in flavor. At maturity the tops die down close to the bulb. For table use and pickling there is no onion that equals it. I cannot too highly recommend it. Pkt., 5c; 2 pkts., 12c; 6 pkts., 20c; oz., 30c.
Mammoth Silver King Onion

The largest white onion, grows to a remarkable size, average diameter 5 to 7 inches, bulbs often weighing 3 to 4 pounds each, being attractive in shape, flattened but thick through. There is no other white onion that attains such a mammoth size. The skin is a beautiful silvery white. Flesh is a snow white, and is of a particularly mild and pleasant flavor, so sweet and tender that it can be eaten like an apple, matures quite early and a sure cropper. You can grow mammoth specimens from seeds sown early in spring in your garden. Try this great onion.

Prize Taker produces large, handsome bulbs of superior quality and grows very uniform in size, nearly perfect globe. It has a very small neck and always ripens up hard and fine without any stiff necks. The skin is of a bright straw color and presents a handsome appearance in market. The bulbs grow to an enormous size, often measuring 10 to 15 inches in circumference, and attract a great deal of attention in any market. The keeping qualities are excellent and the bulbs appear to be as firm and solid in the spring as when put away in the fall.

Parsnip

Improved Long Smooth or Sugar

This is one of the very best Parsnips in cultivation. It matures early, yielding a large crop and bringing the highest prices. The roots grow to a fine size, enabling them to be easily dug. They are very smooth, the flesh is fine grained, and of excellent quality. It is a great cropper, and is just the Parsnip to grow in the home garden. It is an easy matter to grow a few Parsnips in your garden. They can remain in the garden all winter and be taken up in spring as wanted.

Spinach

Early Giant Thick-Leaved

This one of the largest varieties grown. Stands hot weather well. A great favorite in all parts of the country for spring or fall sowing.

Salsify or Vegetable Oyster

Mammoth Sandwich Island

This is one of the largest and smoothest, and most profitable of vegetables for cultivation. Roots are pure white in color, larger than the ordinary salsify, of very superior quality and fine flavor. Flesh very fine grained, tender and of pronounced and agreeable oyster-like flavor, invaluable to market gardeners, and just the one to grow in the home garden.

Giant Crimson Rhubarb or Pie Plant

It is the earliest of all Rhubarbs. As fast as stalks are pulled new ones take their places. Stalks are of medium size, of good length, about one inch in diameter, of beautiful crimson color, the quality being simply superb, fully equal to the finest berries for sauce or pies. It is a revelation of fruit and vegetable. The skin is so thin and tender it is not necessary to remove it, and when cooked makes a beautiful crimson sauce which looks and tastes like berries. Rhubarb is one of the first vegetables from the ground in spring and the earliest plant of all perennials to grow. You can grow good plants from seeds. Every garden should have a few Rhubarb plants.

The Leading Parsnip

Improved Long Smooth or Sugar

Mammoth Sandwich Island Salsify or Vegetable Oyster
Telephone A strong, luxuriant growing small- bean variety, attaining a height of about 3 ft. Very productive, producing a large number of pods to the stalk. The pods are filled large and filled with plump peas, on the average, about 10 to 12 peas to a pod are common. Pkt., 10c; 3 pkts., 25c; 6 pkts., 30c; ½ lb., 25c; 1 lb., 45c.

Thomas Laxton

AMERICAN WONDER—Early Pea and is preferred by many. Its earliness makes it a valuable sort to grow. It is of dwarf, robust habit, producing a profusion of good-sized, well filled pods. Pkt., 10c; 3 pkts., 25c; 6 pkts., 30c; ½ lb., 25c; 1 lb., 45c.

Mills Enormous Giant of the Pea Family

Mills First-of-All Pea

The very best early smooth Pea. Its height is about 3½ ft. and produces pods of food size which are well filled with smooth, round creamy white peas that ripen so evenly that three or more crops can be made from a single sowing. It is known to be the best variety for late spring planting. Pkt., 1½ c.; 3 pkts., 25c; 6 pkts., 40c; 1 lb., 50c; ½ lb., 75c; postpaid.

Thomas Laxton

This is a fine new early wrinkled Pea and somewhat resembles Gradus Variety. It is shorter and more compact, producing a large number of pods to the stalk. The pods are filled large and filled with smooth peas, on the average, about 10 to 12 peas to a pod are common. Pkt., 10c; 3 pkts., 25c; 6 pkts., 30c; ½ lb., 25c; 1 lb., 45c.

Gradus or Prosperity

It is popular wherever grown and is considered one of the very best large- pea varieties which will mature pods only a few days later than the small-pod round seeded extra early varieties. The pods and peas are always large and tender and sweet for some time after they are large enough to use. Pkt., 10c; 3 pkts., 25c; 6 pkts., 30c; ½ lb., 25c; 1 lb., 45c; postpaid.

Unsurpassed Everbearing

Grows about 2 to 2½ feet high and produces long, healthy vines with very few 

Gradus or Prosperity

Champion of England

A well known variety and has been one of the best for late sowing. Pkt., 10c; 3 pkts., 25c; 6 pkts., 30c; ½ lb., 25c; 1 lb., 45c; postpaid.

Unsurpassed Everbearing

Grows about 2 to 2½ feet high and produces long, healthy vines with very few

Unsurpassed Everbearing

Champion of England

A well known variety and has been one of the best for late sowing. Pkt., 10c; 3 pkts., 25c; 6 pkts., 30c; ½ lb., 25c; 1 lb., 45c; postpaid.

George Speckled, Hampden County, Mass., writes:

Received the seeds 2 weeks after spring and had the success with them, not having used them before with any seeds.
Peppers

Mills Improved Ruby King

A well-known variety and one of the best pepper stocks for the garden or the market. It is grown in large sizes, producing large, brilliant red peppers which are sweet and of mild flavor. Ruby King is a sort that can be relied upon, and the seeds are selected from extra large specimens. Pkt., 5¢; 3 pkts., 10¢; 6 pkts., 18¢.

Mammoth Golden Queen

This is the latest pepper, handsome, very productive, perfect in shape, uniform in size, mild flavor and of a golden wax-like yellow color. The illustration gives a good idea of the appearance of the plant of this handsome variety. Pkt., 5¢; 3 pkts., 12¢; 6 pkts., 22¢.

Mammoth Golden Queen Pepper

Mexican Bouquet Pepper

Long Red Cayenne

Chinese Giant

New Tomato Pepper

Many people, when first seeing it, call it a tomato. It makes an upright growth and is distinct from any other, enormously productive and so mild it can be eaten out of the hand like an apple. It learns from June until fall. Pkt., 5¢; 3 pkts., 10¢; 6 pkts., 18¢.

Egg Plants

BLACK BEAUTY - This is one of the earliest and best of all large-fruited Egg Plants. It grows large and the color is a rich, deep purple. Excellent for table or home garden. Pkt., 5¢; 3 pkts., 10¢; 6 pkts., 18¢.

NEW YORK IMPROVED LARGE PURPLE

This is a new variety of large-fruited Egg Plants, bearing large, thick, white, quite productive clusters of small, delicious fruits. Pkt., 5¢; 3 pkts., 10¢; 6 pkts., 18¢.

Chinese Giant Pepper

A large variety producing enormous fruits in great abundance on strong plants which grow about 2 feet high. A handsome branching character. The peppers are thick, tender and mild, while the skin, when ripe, is of a brilliant scarlet. It certainly is a giant variety of the mildest flavor and pronounced the most and largest pepper grown. Pkt., 5¢; 3 pkts., 10¢; 6 pkts., 18¢.

Giant Crimson Pepper

Early, large and smooth

This is an exceptionally early, large, smooth sweet pepper. It is the earliest maturing large variety on the market. The plant is vigorous and upright growing 2½ to 3 feet high. The fruit is not quite as large as the Chinese Giant, but some prefer it. Very sweet, with exceptionality thick, heavy flesh. The color is a beautiful deep green when young, turning to a deep crimson when matured. An excellent large mango pepper used for stuffing equally as good for the table. An ideal home garden sort. Pkt., 5¢; 3 pkts., 10¢; 6 pkts., 18¢.
RADISH

Icicle

This is a long, extra early variety with color of snow-white. It is crisp and brittle and of an excellent mild flavor. Many claim that it has a better flavor than the scarlet varieties. It has the same mild flavor at all stages of its growth and is the most popular of any of the white sorts. It is a short-stem variety, having few leaves and the roots are very small in size. I sell more Icicle Radish Seed than any other variety.

Pkt., 5¢; 3 pkts., 10¢; 6 pkts., 15¢; oz., 25¢; lb., 30¢.

MILLS EARLIEST—This is a handsome Radish and without doubt one of the earliest in cultivation. It has been my favorite for years. It certainly is a beautiful variety. Round with dark scarlet skin, very tender and of fine flavor. Has short, narrow leaves, making a very short top and is sure to become a favorite with all who plant it. My seed stock is very fine and I can recommend it to all. Pkt., 5¢; 3 pkts., 12¢; 6 pkts., 20¢; oz., 25¢.

15 Day This Radish is a wonder for early growth and I think it is a few days ahead of my earliest. Records show it has produced radishes fit to use in 15 days. In very crisp, tender, of a deep scarlet color.

Mrs. H. J. Engleman, of Ohio, writes: "I am more than pleased with your seeds. The Icicle Radish was just grand. I cannot say too much for it."

Pkt., 8¢; 3 pkts., 20¢; 6 pkts., 30¢.

All-Seasons Radish Mixture

The best mixture of Radishes ever offered; contains all shapes, sizes and colors. Just the thing for small gardens when space is limited, and you want to have radishes very early and continue throughout the season, having all the leading early, medium and late sorts. I am sure this mixture will surprise you.

Pkt., 5¢; 3 pkts., 10¢; 6 pkts., 15¢; oz., 9¢; ¼ lb., 25¢.

Early Scarlet Turnip

WHITE-TIPPED—This Radish is pure scarlet and is sure to please all who grow it. It presents a beautiful appearance and is very popular. The skin is very smooth; flavor excellent; tender, crisp and mild.

Pkt., 5¢; 3 pkts., 10¢; 6 pkts., 15¢; oz., 9¢; ¼ lb., 30¢.

Rose China Winter

A large fine shaped, rose colored Radish, growing partly above the ground. The portion above ground is darker in color than that below ground. The size is 3 to 4½ inches long and in proportion. Flesh pure white. Flavor mild to slightly pungent. A good keeper for use in winter.

Pkt., 5¢; 3 pkts., 10¢; 6 pkts., 15¢; oz., 9¢; ¼ lb., 30¢.

California Mammoth White Winter

Grows to a larger size than any other White Winter Radish. I have grown specimens measuring 7 inches in diameter and about 18 inches in length, weighing 8 pounds. It is an excellent table variety, having a mild and pungent flavor at all stages of growth.

Pkt., 5¢; 3 pkts., 10¢; 6 pkts., 15¢; oz., 9¢; ¼ lb., 30¢.

This is an early turnip-shaped Radish, but double the size of other varieties of that type, often measuring 6 to 7 inches in circumference. Notwithstanding its large size, it has an excellent flavor, mild and crisp, and has not the hollow or sappy center, while it is equally suitable for forcing or planting in the open ground as varieties developing to only half its size. It is a rapid grower.

Pkt., 5¢; 3 pkts., 10¢; 6 pkts., 15¢; oz., 9¢; ¼ lb., 30¢.

FRENCH BREAKFAST—This is an early bright scarlet, tender and an excellent variety for forcing in frames for early market. One quick growing, and its beautiful rose scarlet color, with white tip, makes it everywhere. The standard early variety in the French race. Grows in all climates; is very attractive.

Pkt., 5¢; 3 pkts., 10¢; 6 pkts., 15¢; oz., 9¢; ¼ lb., 30¢.
### PUMPKINS

#### Golden Sugar

Is a splendid Pie Pumpkin. The pumpkins are not large, but of excellent quality, and I am sure will give great satisfaction. It is extremely early, remarkably prolific, yielding six to twelve medium size pumpkins to a vine; fine grain, sweet, sugary and the earliest of all Pie Pumpkins.

Pkt., 5c; 3 pkts., 15c; 6 pkts., 18c oz., 12c; ½ lb., 36c; ½ lb., 55c lb., 5.00 postpaid.

#### Winter Luxury

Enormously productive, of medium size, golden russet in color and one of the best for pies. A great keeper; fine grain; rich and sweet.

Pkt., 6c; 3 pkts., 18c; 6 pkts., 34c oz., 25c; ½ lb., 51c; ½ lb., 40c.

### Surprise Pumpkin Mixture

MY SURPRISE PUMPKIN MIXTURE IS A WONDER—You can grow a great lot of pumpkins, including earliest, medium and late varieties, with all the old-faithful and mammoth sorts, if you plant seed of this mixture. It is the grandest collection of pumpkins ever offered. This seed will produce pumpkins of every imaginable shape and color, and I know you will be pleased with it.

Pkt., 5c; 3 pkts., 15c; 6 pkts., 18c oz., 12c; ½ lb., 36c; ½ lb., 55c lb., 5.00 postpaid.

### Common Field Pumpkin

This is the ordinary Yellow Pumpkin used to plant in corn fields for feeding stock. It is very productive. Hardest of all and good for pies.

Pkt., 5c; 3 pkts., 15c; 6 pkts., 34c oz., 9c; ½ lb., 30c.

### Quaker Pie

This is a handsome Pie Pumpkin, creamy white on the inside and out—doh is sweet and rich.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 18c oz., 12c.

### Everybody's Tomato

Best Early Dwarf Tree Tomato

Everybody's Tomato is the very best. Extra Early Tree Tomato, which is a selected strain "Everybody" should grow, hence its name. This variety develops a vigorous, stiff and upright plant producing fruit well above the ground. Fruit is produced in great abundance. Is nearly round, smooth, of medium size, being a handsome purplish pink color, while the quality is the very best. The dark green leaves are very striking in appearance, making the plant stand out distinct from all others. Everyone will be pleased with this tomato.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 25c.

---

**Mr. J. P. Swann, of Fulton County, Kentucky, writes:**

I wish to state that the Peas you sent me, MILLS Enormous, are the finest that I ever saw. They have their right name.
Selected Squashes

True Hubbard
This is the well known variety planted by more people than any other sort, and has become the American favorite. There is always a ready market in the large cities for this favorite sort. It outsells all other varieties. I have taken particular care in selecting my strain and I believe my Hubbard is the choicest type of Hubbard Squash grown. The flesh is a rich yellow, is very fine grained, solid, sweet and dry. The strain is nearly always true in color, being a dark green. I can highly recommend my True Hubbard seed to all, and have a choice supply.
Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 15c; lb., 10c.

Golden Summer Crookneck
This Summer Squash is still the most desirable early summer variety. The outer skin is very tough and of a light orange yellow. Pkt., 5c; 3 pkts., 10c; 6 pkts., 15c; oz., 25c; lb., 40c.

Squash Mixture
All the early and late sorts are included and this is a good selection to plant for a collection of varieties. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 15c; lb., 50c.

Mills Giant Squash

Delicious—It is claimed on good proof that this Squash has no equal in good qualities. Everyone who has grown it claims the richness of grain and rich flavor. It has a small seed; large, solid flesh and is a wonder to grow, grows to weigh from 2 to 10 pounds, and keeps in good condition all winter and up to April 10. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 15c; lb., 50c.

Mills Giant
Harvest of all Squashes. It is a perfect wonder. This Giant Squash has become a great favorite as well as having a great reputation. It weighs from 1 to 6 pounds, is bright yellow, skin very smooth, flesh quite thick, quality good, is very productive excellent to grow for exhibition as it is a specimen often weighing over 250 pounds each. It is a good winter keeper, and there is nothing that can come anywhere near equaling it in size, except Mills Giant Pumpkin. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 15c; lb., 50c.

Odd Collection of Gourds
Here is a wonderful mixture of rare, strange, curious Gourds one would never think of seeing. The colors, shapes and sizes would astonish you. Just the seed you will want to plant for a curiosity. Contains about all sorts to the way of gourds. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

Calabash Pipe Gourds
This is a wonderful, attractive Gourd which anyone can grow, and it can be used in making pipes. They are the lightest pipes made, for their size, graceful in shape, color like meerschaum.

The plants thrive and do well in all parts of the country, producing an abundance of Gourds from which the pipes can be made. The vine is not only very productive, but ornamental and useful covering arbors, fences and unpleasant places. Anyone can grow it in the garden, back yard, or place around the house. Pkt., 5c; 3 pkts., 12c; 6 pkts., 18c.

Vegetable Peach
Here is a vegetable you should grow. The fruit is about the size of a large Peach, of a bright orange color, which is produced on vines somewhat smaller than a muskmelon vine. It is easily grown, fruit fine, and a good keeper. It is fine for pies, sauce, preserves or sweet pickles. Grow it this year. Recipe for cooking, canning and preserving free with every order. Pkt., 10c; 3 pkts., 25c.

Vegetable Orange or Garden Lemon
This is a splendid novelty of recent introduction, handsome in color and appearance and an enormous yielder. As shown vines are smaller than a muskmelon vine, but they require about the same cultivation. It is a wonderful yielder, producing fruit about the size of an Orange, of a bright yellow color, somewhat ruffled. For sweet pickles, pies or preserves, they are splendid and can be used in many ways. Pkt., 5c; 3 pkts., 12c; 6 pkts., 18c.
Tomatoes

Everybody's Tomato (Earliest Dwarf Tree Tomato)
It's a Beauty. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

Quick Crop Tomato—One of the Earliest in Cultivation

This is the great tomato I recently introduced and I have received nothing but praise for it from every section where it has been grown. It has made wonderful records everywhere. It is handsome in shape, as will be seen by the illustration; very smooth, thick from stem to blossom end, very solid and heavy. Free from cracks and ridges, and the meat is solid, with only a few seeds. The color is a beautiful dark red. The fruits are produced in large clusters, ripening from early summer until killed by frost. Taking all points into consideration, it is one of the most perfect early tomatoes I have ever grown. Not only is it perfect in form and quality, but it is a perfect wonder for earliness, producing large, handsome, red fruit very early. The vines grow strong and are very hardy, making it desirable for early planting. Not half enough can be said in favor of this great early tomato, and I want my customers to grow it this year. It deserves a place in every garden, and I highly recommend it to everyone.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 18c; oz., 30c.

Great Tomato Collection

A packet of mixed tomato seeds will prove a great curiosity. It contains all the varieties I offer and many others. All the early, medium and late kinds of the different colors, shapes and sizes will be produced. One of the most interesting collections ever offered.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 18c; oz., 30c.

June Pink
Deep pink or purple. Young plants develop a large cluster of blossoms very soon after being planted in the garden. Fruit measures 3 to 6 inches in diameter, and is borne in clusters. Mild, sweet flavor. This tomato is well worth growing.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 18c; oz., 30c.

Sparks Earliana
This is a smooth Tomato and is claimed to be one of the earliest varieties grown, especially adapted for market gardeners, of a beautiful red color.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 18c; oz., 30c.

Golden Queen
A first class, large smooth, pure yellow Tomato, the best of the yellow class.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 18c; oz., 30c.

Mills Early July Tomato

Mills Early July
This is a splendid early variety I have made quite a specialty of for several years. Its great value lies not only in the time of ripening its first fruits, but such a quantity of fruit can be gathered from a single plant while many other early varieties ripen only a few fruits. They are perfectly smooth, large size and very handsome, the color being a bright red. They grow in large clusters, which ripen from July until killed by frost, and command the highest market price. This variety deserves a place in every garden, and I can highly recommend it.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 18c; oz., 30c.

Ponderosa
This variety is claimed by some to be the grandest Tomato ever grown. A large, handsome variety. Often attains a circumference measurement of 15 inches, and frequently weighs 2 pounds each. Perfect in form, almost seedless; ripens thoroughly and is quite free from wrinkles, very solid and meaty. A handsome crimson in color and free from rot. It is a very healthy grower, free from blight and a continuous bearer all season.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 18c; oz., 30c.
Giant Climbing
OR MILLS MAMMOTH PRIZE TOMATO

This great tomato is known as Giant Climbing Mills Mammoth Prize Tomato and is one of the best for growing in the hothouse or greenhouse, and is being grown with great satisfaction everywhere. It is claimed a very good quality to be grown in a Tomato. We are sure and in fact we properly trained and a tall stake of 15 feet high and carry an ordinary stake of 6 feet high. Its fruit is large, measuring 6 inches in diameter, and a marked part of this variety is its almost seedless character. Nearly all the fruit ripen from July until late in August. There is no curiosity without this a Mammoth Tomato.

**CAUTION**—There are the same growing bush tomatoes called True Tomatoes.

If you want the true GIANT CLIMBING order your seed of us and you will not be disappointed.

**Photograph of One Plant Home Tomato Trimmed to Fit the Trellis 360 Tomatoes on This Plant.**

This is a very interesting Tomato and you should grow it.

**History of the Home Tomato**—One plant was discovered in a Boer who saved it because this plant grew far ahead of all the others. It was quite distinct in large fruits. It was set in a foot-inch pot, and when only eight inches high, it had blossomed three times and was transplanted to the ground and grew to cover an area of fourteen feet in diameter, it was turned with tomatoes. In order to keep pure, it was propagated from its original plant. The picture shows one of these curious green leaves. This plant was grown to fill the whole, but it produced 360 tomatoes. In the first year, it was named Home Tomato, on account of its curiosities, deliciously round, smooth shape, solid meat and productivity. Just the plant for a home garden, where it can be trellised when space is limited. If you can't get a home garden, where it can be trellised when space is limited. If you can't get a home garden, where it can be trellised when space is limited.

**Photograph of One Plant Home Tomato Trimmed to Fit the Trellis 360 Tomatoes on This Plant.**

This is a very interesting Tomato and you should grow it.
Garden Turnips and Rutabagas

Early Snowball or Six Weeks
This is one of the Best Extra Early Turnips in cultivation. The bulb is of medium size, white, smooth and of excellent flavor.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 15c oz., 11c; ½ lb., 35c.

Purple Top Strap Leaf
The bulb is very flat, of medium size and quite smooth, with a bright purple top; very fine grained.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 15c oz., 11c; ½ lb., 35c.

Early White Flat Dutch
This is another early variety which grows to a medium size very quickly. It has a clear white skin and is always choice for table use, and is one of the very best varieties for spring sowing.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 15c oz., 11c; ½ lb., 35c.

EXTRA EARLY MILAN—One of the earliest varieties grown. Bulbs are flat, of medium size, smooth, with a small purple top. Flesh is pure white; fine grained, hard, solid, and an excellent keeper.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 15c oz., 11c; ½ lb., 35c.

BREADSTONE—A medium size, very quick growing, and roots are smooth, white with colored tops. Flesh perfectly white, fine grained, cooks quickly. One of the best in cultivation for winter and spring use.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 15c.

GOLDEN BALL—Very early; fine quality and keeps well; excellent for table use or stock feeding.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 15c oz., 11c; ½ lb., 35c.

HEAVY CROPPING RUTABAGA—One of the most prolific of Swedish Turnips as well as the hardest, heartiest, best shape and most productive. The flesh is yellow, of the choicest quality, and bulbs always remain sound and good when other varieties will rot.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 15c oz., 11c; ½ lb., 35c.

SUPERB MIXTURE OF TURNIPS—This mixture contains all the leading varieties, both early and late, and by sowing this seed a continuous supply may be had throughout the season.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 15c oz., 11c; ½ lb., 35c.

Giant White Sweet Rutabaga
A very choice Rutabaga, growing to a good size, always solid, rich flavor, while the flesh is pure white. Just the Rutabaga to grow in the garden to get a 65 lb. yield from a small plot of ground. I can recommend this as the very best White Rutabaga.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 15c oz., 11c; ½ lb., 35c.

Ground Almonds

THE GROUND ALMOND, or Chufa, as some call it, has a fine flavor, resembling the Coconut or Almond.

The most is snow-white, covered with a thin shell or skin of brown color. It grows close to the surface, is very prolific, a single nut yielding from 200 to 400 nuts in a hill and will do well in any kind of soil. If the nuts are planted in the spring the same as potatoes, a big crop can be expected about potato harvest time. They grow so rapidly and produce such immense crops that you will be surprised when you see what is produced. Try a few in your garden this year. If you will have a novelty to show to your neighbors.

Pkt., 5c; 3 pkts., 15c; 6 pkts., 25c.

Mills Mammoth Peanuts

MILLS MAMMOTH PEANUTS can be grown successfully in almost any place where corn succeeds. This variety contains earliness and large size, and is also very prolific and grows to an astounding size. They make compact bushes about 18 inches high. The giant nuts have a thick shell, quite heavily ribbed. Every part is useful; the vines as valuable food for horses, cattle and sheep; producing from one to two tons of vines per acre, while the nuts contain a large percent of rich nourishment. Try a few in your garden.

Pkt., 10c; 3 pkts., 25c; 6 pkts., 40c.

Early Spanish Peanuts

This is a great Peanut, especially for the far North. It is very early, and if planted early in May will ripen the first of September. The pods do not grow as large as those of other varieties, but its extreme earliness makes it a very desirable sort to grow everywhere. Try a few in your garden.

Pkt., 10c; 3 pkts., 25c; 6 pkts., 40c.

Champion Moss Curled Parsley

Produces wrinkled and curled leaves, a choice selected strain.

Pkt., 5c; 3 pkts., 10c; 6 pkts., 15c oz., 12c.
Two Pages Novelties For Trial

I offer several novelties this year I feel sure will please my customers. One of them a new creation, the Burbank tomato direct from Luther Burbank as shown on front cover. I believe every one is a good novelty, worth growing, and want them tested in all parts of the country this year. Give them a trial.

MILLS ENORMOUS PEA

Get Mills Enormous Pea this year—I have great reports from my customers who grew it last season, and you will be delighted with it. Think of it—great pods of 7 inches or more in length, filled with 10 to 12 mammoth peas of the very finest flavor.

If you do not want many seeds this year don’t fail to order Enormous Pea, also the "Burbank Tomato" offered on front cover—two of my greatest novelties.

Mills Enormous Pea

Mills Enormous Pea is certainly the giant of the pea family. There is nothing offered in this Seed Book more remarkable than this Giant Pea, when you consider that it will produce pods attaining the extraordinary length of 7 inches and upwards, closely packed with from 10 to 12 large dark green peas of fine flavor. The plants grow very vigorous from 5 to 6 feet in height and the giant pods are produced in great profusion, filled with enormous sized peas. Every customer will be delighted with this Giant Pea. A few plants growing in your garden will produce a great quantity of peas, and will be very interesting to show your neighbors. By giving the vines a little support you can get an enormous yield from little ground. Don’t fail to try it.

Packet, 10c; 3 pkts., 25c; 6 pkts., 40c; 1/2 lb., 50c; lb. 75c, postpaid.

Giant Butter Radish

An interesting novelty, a giant radish with small tops and bright scarlet color, flesh crisp with zones of pink, very tender and a loose keeper. This splendid radish is fine for forcing, for it does not become hollow or pithy. The flesh is crisp and highly flavored, making it a novelty well worth trying.

Pkt., 6c; 3 pkts., 15c; 6 pkts., 25c.

Bantam Evergreen Sweet Corn

This is claimed the greatest S. Corn yet introduced and one-third larger than Golden Bantam, and superior quality to that famous variety. A heavy yielder, very prolific and a long keeper. No other corn yields so little ground. All with bristles, a hard kernel, and a sweet flavor. The plants grow 5 to 6 feet in height and the ears are produced in great profusion, filled with enormous sized corn. Every customer will be delighted with this Giant Pea. A few plants growing in your garden will produce a great quantity of peas, and will be very interesting to show your neighbors. By giving the vines a little support you can get an enormous yield from little ground. Don’t fail to try it.

Packet, 10c; 3 pkts., 25c; 6 pkts., 40c; 1/2 lb., 50c; lb. 75c, postpaid.

Giant Butter Radish
Brazilian or Stooling Flour Corn

This is claimed to be a great stooling corn, each kernel producing from 3 to 4 stalks with from 2 to 4 ears on each stalk, from 3 to 6 inches in circumference, and from 8 to 12 inches in length of pure white kernels. It is claimed this corn will yield nearly four times more corn to the acre than any common corn and makes a great variety for silage. It is also claimed to contain a larger percentage of starch than any other corn, and when ground the same process as wheat gives as good flour as can be made from wheat. Plant two to three kernels in a hill but allow only one to grow, and cultivate the same as other corn. It produces an abundance of fodder and is valuable for silage. It does not require much rich ground as many other varieties of corn, therefore it is the best for poor soils. These are the claims of the introducer and I think my customers will be highly pleased with it. I consider this one of the interesting novelties. Try it.

Pkt., 6c; 3 pkts., 15c; 6 pkts., 25c.

Everbearing or New Zealand Spinach

It is claimed this Spinach is available for use during the hottest months of summer when ordinary Spinach is not to be had. It can be cut often and the tender foliage is quickly renewed. It grows well everywhere, grown in spring it is soon fit for use. There is nothing better for the family garden than this everbearing or New Zealand Spinach, it bring the most healthy of vegetables for it contains a large percentage of iron, a most necessary article.

It is claimed by the introducer that it is the only kind that will furnish a constant supply all through the season, and I advise my customers to try this wonderful strain for it means a great deal to be able to cut and use spinach all summer.

Pkt., 6c; 3 pkts., 15c; 6 pkts., 25c.

Butter Ball Turnip

A beautiful, perfect golden yellow turnip. Flesh very transparent, grows to about the size of a large apple and is very round and perfect. It is very early and producing turnips large enough for cut in 3 to 40 days. Has mild flavor and you should try it in your garden this year.

Pkt., 6c; 3 pkts., 15c; 6 pkts., 25c.

American Wonder Pop Corn

Largest Pop Corn ever grown, see photo of sample ear. It is truly a wonder both for quality and yield. Kernels are large and round and pods twice the size of other varities. Pop readily and is of a delicious flavor. Such large, handsome ears and kernels will surely surprise you. Do not fail to try it.

Pkt., 6c; 3 pkts., 15c; 6 pkts., 25c.

Lemon Cucumber

Quite a novelty, grows nearly round with green and yellow markings. Skin smooth, flesh tender and crisp. Fruits grow quite uniform in size, excellent for table use, very productive. You should grow a few hills in your garden this year.

Pkt., 6c; 3 pkts., 15c; 6 pkts., 25c.

Egyptian Wheat Corn

This is quite an interesting novelty, was brought to this country from India. Is of stooling habit, producing 2 to 6 stalks from one seed loaded with seed. It makes excellent feed for chickens and for other stock, and will also pop like pop corn, and can be ground for flour. Will greatly outyield Kaifir Corn, or any Cane or Sorghum plant. A little row of this corn in your garden or in any good soil will produce a great quantity of feed and bath.

Pkt., 6c; 3 pkts., 15c; 6 pkts., 25c.

Grape Tomato

This is a real curiosity as well as being very valuable. It will trail on an arbor, fence, or wire, or fence and produce great clusters of fruit. The fruit is a handsome rich red, and has a tomato flavor and is excellent for preserving, canning, and in various ways. Very attractive for your garden or back yard.

Pkt., 6c; 3 pkts., 15c; 6 pkts., 25c.
Giant Branching Comet

Here is a novelty which originated in California and is sure to please everyone. The plants grow about 15 inches high and branch vigorously; often a plant measures 20 inches across. The stems are frequently 12 inches long and each plant produces from 25 to 30 blooms. The flower is full, double measuring 3 to 5 inches, and is true comet type.

All Colors, Mixed, pkt., 8¢; 3 pkts., 12¢; 6 pkts., 20c.

Early Blooming Aster

All those who want Asters very early in the season should grow this one, which is the earliest in cultivation; from three to four weeks earlier than any other Aster. Its large flowers, as well as its spreading habit of growth, make it a handsome plant.

All Colors, pkt., 8¢; 3 pkts., 12¢; 6 pkts., 20c.

Alyssum

LITTLE GEM—Grows 2 to 4 inches high and one plant will completely cover a circle 12 by 14 inches in diameter. Very fragrant, and the flowers are pure white.

Pkt., 8¢; 3 pkts., 12¢; 6 pkts., 20c.

SWEET—This is pure white, much used for borders; it fragrant and produces very delicate flowers.

Pkt., 8¢; 3 pkts., 12¢; 6 pkts., 20c.

Ricinus (Castor Oil Bean)

ZANZIBARENSES—This is a handsome, quick growing Ricinus or Castor Oil Bean and if planted in the open ground in May should be in full foliage in July and attain a height of from 12 to 14 feet during the season. The gigantic leaves measure 3½ by 4 feet across.

Pkt., 8¢; 3 pkts., 12¢; 6 pkts., 20c.

Baby Golden Glow

This is a beautiful annual, producing a yellow flower, which makes a pleasing effect. They will begin blooming early in the season and each plant will produce hundreds of bright yellow flowers as double and perfect as roses. The Baby Golden Glow grows only from 20 inches to 2 feet in height and resembles the famous Golden Glow which is a tall growing, late flowering perennial plant.

Pkt., 8¢; 3 pkts., 12¢; 6 pkts., 20c.

Defiance Balsam

This is the most attractive mixture of Balsam seed ever grown. It produces plants that are covered with very large, double flowers of all the colors imaginable. It will be a favorite wherever grown.

All Colors, pkt., 8¢; 3 pkts., 12¢; 6 pkts., 20c.

Celosia (Comb)

All Varieties Mixed—This will make a great collection, producing many curious plants and flowers.

Pkt., 8¢; 3 pkts., 12¢; 6 pkts., 20c.

Giant Larkspur

An improved type, producing large flowers, very double, of various colors, shades and mark- ers, which are borne on long spikes like immense Hyacinths. Can be easily grown in the open ground. All Colors, Mixed, pkt., 8¢; 3 pkts., 12¢; 6 pkts., 20c.

Coleus

I offer a choice collection of colors, which includes all the large-leaved varieties. 8-edged oval leaves will produce strong, vigorous plants. Mixed Colors, pkt., 8¢; 3 pkts., 20c.

Giant Hyacinth Flowered Canary

The flower heads grow nearly 6 inches long, nearly 3 inches in diameter, and the color is bright white. The plants grow about 18 inches high both from 4 to 6 of these immense flower heads on upright stalks and each plant will send out 4 branches.

Pkt., 8¢; 3 pkts., 12¢; 6 pkts., 20c.

All Colors Mixed—Pkt., 8¢; 3 pkts., 20c.
Giant Cosmos
Three Giant Flowering Cosmos often produce flowers 4 to 5 inches across. For cutting, this is one of the most flowers grown, long stems and feathery foliage, produces a graceful effect. They are easily raised from seed.

ALL COLORS MIXED—This contains all the varieties, which make a great display of colors. Pkt., 5c; 3 pks., 12c; 6 pkts., 20c.

Giant Early Flowering Carnations
AN EARLY FLOWERING STRAIN
This is a wonderful strain of early Flowering Dwarf Perpetual Carnation which will produce flowers in three or four months from seed. The plant is of dwarf compact habit, branching out just above the ground. The variety of colors includes buff, deep pink, white, salmon, maroon, dark crimson and many beautiful variegated flowers, a great many of which have beautiful fringed petals and are very fragrant. The plants grow easily anywhere. In about 12 weeks after the seed is sown they begin to bloom and an abundance of flowers will be produced until frost comes. Seed sown during the summer will produce plants which can be potted in the fall and will produce an abundance of bloom throughout the winter.
Pkt., 5c; 3 pks., 12c; 6 pkts., 20c.

Mignonette
FINE MIXED—This contains all known varieties. It is a very choice selection. Pkt., 5c; 3 pks., 12c; 6 pkts., 20c.

New Ornamental Cotton
This Cotton makes a very beautiful decorative plant when growing, and for cutting in the fall for house as everlasting, there is nothing better. Silky leaves are green, white, yellow and red. The cotton is very valuable for vases, covered with various colored flowers. Pkt., 5c; 3 pks., 12c; 6 pkts., 20c.

Calliopsis
This is a half hardy annual of gaudy color, bearing a profusion of bright colored flowers of all colors. Pkt., 5c; 3 pks., 12c; 6 pkts., 20c.

Great Fountain Plant
The Fountain Plant, or *Amaranthus cruentus*, is a very beautiful annual, peculiar in form and habit. A wonderful decorative plant in a large maroon or hyacinth tone, with rich green foliage, and crimson, yellow, or orange flowers. It is easily raised from seed anywhere. Seeds grow readily. Pkt., 5c; 3 pks., 12c; 6 pkts., 20c.

Brilliant Mixed Poppies
These Poppies grow 12 to 15 inches high, branch freely and bloom continuously for weeks. Flowers are immense, both in size and color. Their colors run throughout all shades and make a gorgeous sight all summer. All colors.
Pkt., 5c; 3 pks., 12c; 6 pkts., 20c.

Snowdrift Poppy
This large variety produces pure white flowers, perfectly round and double, of large size and at a little distance from the bed of them looks like a drift of snow, making a grand sight in summer.
Pkt., 5c; 3 pks., 12c; 6 pkts., 20c.

Perennial Poppies
The single perennial Poppies are perfectly hardy and very attractive on account of the large handsome flowers. Colors, white, pink, red, orange and yellow. Flowers measure 6 to 9 inches across.

Albicans, mixed, pkt., 5c; 3 pks., 12c; 6 pkts., 20c.

Dusty Miller
One of the prettiest of ornamental leaved plants. The leaves are white and are beautiful for vases, edgings, ribbons or mixed with cut flowers.
Pkt., 5c; 3 pks., 12c; 6 pkts., 20c.

Scarlet Banded Poppy
A great curiosity. New species from Asia Minor. Blooms all summer producing flowers 2 to 2½ inches across, with a fairy dark orange center band and with black spots at base. The branching plants grow about 18 inches high. Try it.
Pkt., 5c; 3 pks., 12c; 6 pkts., 20c.

Foxglove
*Digitalis*—Produces long spikes of richly colored flowers, excellent for cutting. A very showy plant. Blooms the first season.
Pkt., 5c; 3 pks., 12c; 6 pkts., 20c.

Forget-Me-Not
*Lychnis—Alpestris Blue*—A grand five-flowered form and the very best variety. Will thrive in almost any soil.
Pkt., 5c; 3 pks., 12c; 6 pkts., 20c.

Wallflowers
FINE DOUBLE MIXED—Contains a large collection of shades and colors. Pkt., 5c; 3 pks., 12c; 6 pkts., 20c.

**Choice Single Mixed**—This includes all single varieties and a good variety of colors. Pkt., 5c; 3 pks., 12c; 6 pkts., 20c.
Everblooming Annual Hollyhock

(They are as easily grown from seed as any annual and commence flowering in about 15 weeks and continue to bloom until killed by frost. Plants from early sown seed set out in May will commence blooming in July and will produce an abundance of bloom throughout the season. This Annual Hollyhock is a wonderful free flowering sort. They are produced in double flowers, semi-double, single, saucer-shaped flowers, some with smooth-edged petals, while others are fringed and of various shapes and shades. The flowers are usually very large, sometimes measuring over 6 inches across. The plants grow very strong and vigorous and are of a branching habit.

Price of seed containing a great mixture of double and semi-doubles, all colors and shades, per pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

Dianthus (Hardy Garden Pinks)

These are the most beautiful of summer flowering annuals. They are unrivaled for brilliancy and variety of colors. The plants are bushy symmetrical form, about a foot high. The flowers grow to a large average about 6 inches in circumference. There is a wonderful variety of colors and they are intensely brilliant and varied. Colors are by description.

DWARF SNOWBALL—These are pure white, producing an abundance of double flowers. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

LARGE FLOWERING DOUBLE HYBRID—All colors. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

Choice Mixed—All colors. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

Kochia Scoparia (Summer Cypress)

A beautiful plant, very unique and ornamental. The rounded globe-like form resembles a delicate evergreen highly colored. Nothing handsomer for an annual border. Early in fall the seeds are thickly set with small bright scarlet flowers. Plants are very showy. When planted in rows simply to show the round, ball-like form they are very striking. Easily grown from seed and can be planted in the ground early in spring. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

Dianthus (Hardy Garden Pinks)

MILLS GIANT— I believe this to be the best collection of Giant Pansies ever offered. The illustration gives a good idea of size of flowers and the rich and varied color range. All who grow these will be abundantly supplied with flowers that will equal the best of their neighbors. All Colors, Mixed, pkt., 10c; 3 pkts., 25c.

GIANT RUFFLED MASTERPIECE— A new type in Pansies, producing giant flowers of the most distinct and striking character. The petals have a rich velvety substance and being ruffled gives them the effect of a double flower. Colors range through all shades known in Pansies. All Colors, Mixed, pkt., 10c; 3 pkts., 25c.

Choice Mixed—A superior mixture of all varieties of Pansies, giving a remarkably fine display of color. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.
Mills Gorgeous Phlox

A bed of these Annual Phlox will surpass almost anything else in dazzling brilliancy. Plants grow about 18 inches high, produce large trusses of immense flowers of various colors, such as deep rose, soft pink, maroon, purple, lavender, dazzling scarlet, pure white and many other shades. Gorgeous Mixtures cannot be equalled. All colors, mixed.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

Marigold

TOM THUMB, Mixed—These dwarf form compact little hedges, 6 to 8 inches high, covered with handsome blossoms from summer until fall. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

French Mixed Colors—These produce large double flowers of rich dark shades.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

Chinese Woolflower

Plants grow 2 to 3 feet high, the bloom starting early with a central head, round and globular, which often reaches the immense size of 2 feet in circumference. Scores of branches are thrown out, each bearing a ball of scarlet wool. All these branches support numerous lateral with small heads of bloom mixed with fresh green foliage, so that a plant looks like an immense bouquet splendidly arranged and set in the ground. None of the blooms fade in any way until his by frost; but all continue to expand and grow with a deepening richness of color, a dark crimson-scarlet.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

Tufted or Bedding "Pansy-Violets"

These are very popular for bedding. They produce beautiful Pansy-like blossoms 2 to 31/4 inches across, of the most brilliant colors, lemon, crimson, orange, maroon, purple, lavender, silver, gray, rose, blue, white, black and mixed colors.

All Colors, pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

Nicotiana

SANDEAE HYBRIDS—These flowers from early summer until late in autumn. Their beauty is beyond description, flowers produced being purple, snow-white, dark and light red, violet, salmon, crimson, pink and various other shades. Thrives in any soil, either in pots, boxes, or in the open ground. Flowers are nearly as large as a Petunia, with tubes 5 inches long, and many of the flowers are delightfully scented. You should not miss this excellent plant as it is good for summer, fall or winter flowering. Cut flowers last well, opening freely in water.

All Colors, Mixed, pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

Mills Giant Verbenas

These Giant Verbenas produce the most beautiful flowers of gigantic size in a wide range of colors than any other Verbenas. A few plants will make a display of colors long to be remembered. The clusters of showy and fragrant flowers are borne in great profusion from June until frost. They are easily raised from seed. Try them.

All colors. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.
**Royal Beauty Portulaca**

This is a grand variety. The flowers are large, while the colors are very brilliant, of red, orange, white, maroon, yellow, and various other shades, impossible to describe. A bed of these double Portulacas makes a magnificent sight.

All colors, mixed, pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

---

**Japanese Morning Glory**

The flowers are of gigantic size and the colorings and markings are beyond description, ranging from snow-white to black-purple with all the possible intermediate shades, such as pink, fiery red, rose, copper, red carmine, crimson, deep blue, pale blue, royal purple, maroon, indigo, bronze, slate, brown and cherry, while many have throat spots—marbled, striped, banded and splashed. The most attractive Morning Glory. All colors, single and double. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

---

**Sweet William**

Excellent for edging or for borders, producing large heads of the richest flowers early in the summer. Very fragrant, excellent for bouquets. Single mixed, all colors. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

**Double Mixed**—Produces double flowers, all colors. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

---

**Cobea (Scandens)**

A rapid growing climber, attaining a height of 15 to 30 feet, and producing rich, double flowers. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

---

**ZINNIAS**

**Giant Mammoth Mixed**

This is a new strain of Zinnias, giant in size, and has perfectly double flowers of the richest and most varied colors and shapes; measuring nearly 6 inches across, of intense brilliant colors. The plants grow about 3 feet high and bloom freely. All colors, mixed. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

**Fairy Zinnias** Covered during the summer and until frost sets in, with very small, perfectly double flowers, embracing a wide range of colors. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

**Striped Zebra** Produces all colors, such as orange, pink, yellow, crimson, violets, scarlet, white, rose, and many are striped with different shades. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

**New Pompone Color** produces a beautiful effect, with rays of white through cream and buff to clear cream yellow, and pinks to deepest crimson and fiery cuppens and reds. All colors. Mixed. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

---

**Japanese Kudzu Vine**

(Jack and the Bean Stalk Vine)

This comes from Japan. With ordinary treatment it will grow 40 to 50 feet in one season, from well-established roots. Filling the air with fragrance of its large clusters of white blooms. Requires little care. It is perfectly hardy, lasts for years. Foliage is large, shaped like the leaf of a bean. Flowers are a pleasing shade of purple. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

---

**Wild Cucumber Vine**

One of the quickest growing climbers. Grows 20 feet in one season, is thickly dotted with pretty white fragrant flowers, followed by an abundance of ornamental prickly seed pods. To cover unsightly buildings and fences nothing can equal it. Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c.

---

**Wild Flower Garden Mixture**—I have made flower seeds, including nearly all flowers that will grow and flower the seed first year. This selection embraces several hundred varieties of easy growing and pretty flowers suitable for a wild flower garden. They are excellent to sow in any corner of the garden or along or any unsightly place where they will grow and bloom freely. Pkt., 5c; 3 pkts., 12c; 6 pkts., 18c; 1/2 oz., 30c.

Sweet Peas and Giant Nasturtiums

Giant Flowering
Gorgeous Mixture
Sweet Peas

Greatest mixture of
colors ever offered. If
there is only one flower
you select from my Seed
Book, let it be this selec-
tion of Sweet Peas. It in-
cludes all the best of the
Spencers. They begin to
bloom early and continue
to bloom for months.
Sow a liberal quantity of
seed.
Pkt., 5c; 3 pkts., 12c;
6 pkts., oz., 25c.

Earliest Of All
Sweet Peas

This is the very earliest,
always coming into bloom
nearly two weeks in
advance of any other
variety. It is so early
that two crops of flowers
may be grown in one
season by simply planting
early in the spring and
those that go to seed, if
sown in August, will
produce flowers in the fall.
Try them.
Pkt., 5c; 3 pkts., 12c;
6 pkts., 20c.

Spencer Hybrid or
Giant Orchid Flower-
ed, Mixed Sweet Peas

This is the Sweet Pea
that is very popular.
The illustration gives but
a little idea of its mam-
moth size and a very
faint idea of the shape.
The enormous flowers are
waved to a remarkable
degree, giving them the
well-deserved title of
Giant Orchid-Flowered
b e y o n d competition
with all other varieties.
The harmony of soft col-
oring in this mixture is
beyond the power of
words to describe. This
mixture contains shades
of white, crimson, lav-
ender, blush, etc., often
many shades of the same
color. You should grow
them this year.
Pkt., 5c; 3 pkts., 12c;
6 pkts., 20c; oz., 25c.

Giant Nasturtiums

I offer a choice se-
lection of Giant
Nasturtiums, both
Dwarf and Climbing,
of a wonderful collec-
tion of colors.

GIANT CLIMBING
—This is the King of all
Giant nasturtiums. It is
as beautiful as an Orchid
on account of the giant
flowers. Plants grow very
strong and vigorous with
large, dark green foliage,
producing great quan-
tities of flowers of all
colors, some measuring
over 3½ inches across.
Just the variety to plant
by an arbor or fence to
make a wonderful display
of colors.
All colors, pkt., Sc; 3
pkts., 12c; 6 pkts., 18c;
z., 20c.

Giant Flowering Gorgeous Mixture Sweet Peas

DWARF BRILLIANT BEAUTIES—These Na-
turtiums are so easy to grow that any child can plant and care for them. The
plants make a symmetrical bush about a foot high and one foot
across of round formation, the foliage being a very attractive
emerald green in color, making it very charming and unique.
They produce a wonderful display of flowers of enormous size of
all colors to be found in nasturtiums, which literally cover the
plants with their showy bloom.
All colors, pkt., Sc; 3 pkts., 12c; 6 pkts., 18c; oz., 20c.
Mills Extra Early Blood Turnip Beet

This is a selected strain that attracts attention everywhere on account of uniform size and handsome appearance. It is very early, the color being a rich dark red, as shown in color plate. The top is small and the beet fine grained; grows smooth and just the right size for home use. This is just the beet for home gardens and does well in any part of the country. It is a wonderful keeper and highly prized by all who have grown it. Try it this year.

Pkt., 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 15c; lb., 50c.

Mills Giant Pumpkin

This is a prize-winning variety growing to enormous size. But few have an idea of the Giant size these pumpkins attain. The flesh is bright yellow, fine grained and of good quality. Notwithstanding the large size of the pumpkin, it is excellent for pies. I have raised specimens weighing over 200 pounds and it is nothing uncommon for my customers who have grown this variety to show specimens weighing over 100 pounds. There is nothing offered that will create a greater interest than this Giant Pumpkin. It is an excellent pumpkin to plant for show purposes on account of its attaining such enormous weight.

Pkt., 6c; 3 pkts., 15c; 6 pkts., 25c; oz., 30c.
